

GoPiGo Scratch Control Panel

This example gives the user to control the GoPiGo using Scratch with an interactive Dashboard.

The Dexter Industries Image comes installed with Scratch and the Scratch library for the GoPiGo.

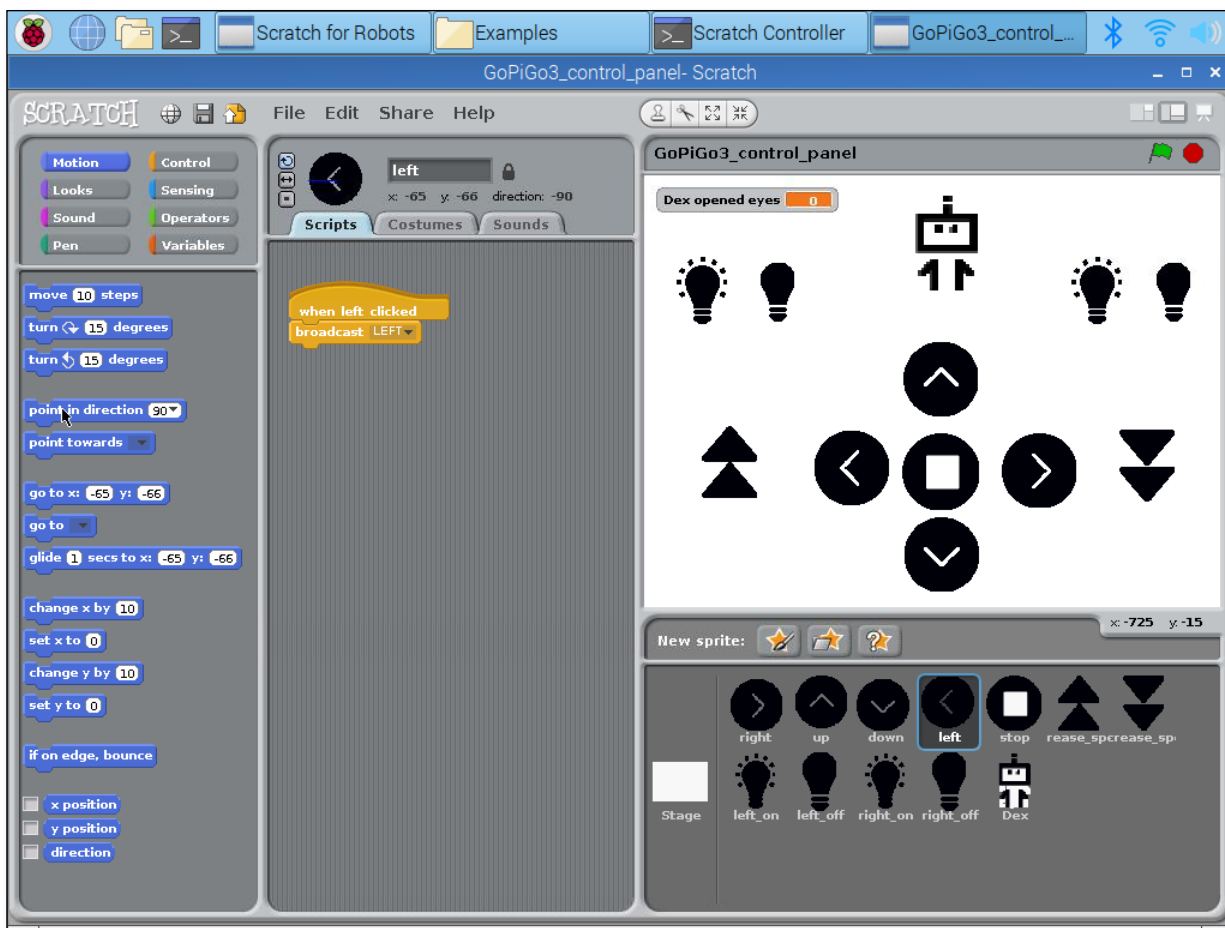

Scratch for Robots

Scratch for Robots is a graphical programming environment.

1. Double click the "**Scratch**" icon on the desktop (identified here with the green arrow)

This will open two windows, a black terminal window called the **Scratch Controller** and the **Scratch for Robots** interface. Do NOT close the **Scratch Controller**, as that will kill all communications between Scratch and the robot!

2. Click on "**Open Examples**" → Double Click **GoPiGo Control Panel**.

3. Click the various buttons to control the GoPiGo
